

Getting Started Guide

Interactive Program Guide

For DVR Customers

Video Output Formats

Use this preference to select an Output Format supported by your TV and to determine how to output non-conforming video.

Select a Video Output Format

Press **B** to access the General Settings menu; highlight the "Output Formats" preference and press **C**. (If your service includes the QuickMenu™, press **B** twice to access General Settings menu.)

Select an Output Format and set Output Format Options

In the Settings column, highlight an Output Format that is supported by your television and press **C**. Your selection will be bulleted and the Options column will become active.

Since programs can have a wide (16:9) or standard (4:3) aspect ratio that may not conform to your selected Output Format, you must choose how to output non-conforming video. Highlight an option and press **C**.

Press **A** to accept your modifications, then follow the on-screen instructions to confirm your new settings.
