2.1.1. Scope

The Company undertakes to furnish communications service in connection with one-way and/or two-way information transmission between points within the State of Illinois under the terms of this tariff.

Customers may use services and facilities provided under this tariff to obtain access to services offered by other service providers. The Company is responsible under this tariff only for the services and facilities provided herein, and it assumes no responsibility for any service provided by any other entity that purchases access to the Company network in order to originate or terminate its own services, or to communicate with its own customers.

Company reserves the right to offer its Customers a variety of competitive services as deemed appropriate by Company.

Company declares that all services contained in this tariff to be competitive telecommunications services, as defined in Section 13-502(b) of the Illinois Public Utilities Act.

2.1.2. Shortage of Equipment of Facilities

2.1.2.1. The Company reserves the right to limit or allocate the use of existing facilities, or of additional facilities offered by the Company when necessary because of lack of facilities or due to some other cause beyond the Company's control.

2.1.2.2. The furnishing of service under this tariff is subject to the availability on a continuing basis of all the necessary facilities and is limited to the capacity of the Company's facilities as well as facilities the Company may obtain from other carriers, from time to time, to furnish service as required at the sole discretion of the Company.

2.1.3. Terms and Conditions

2.1.3.1. Except as otherwise provided herein, service is provided and billed on the basis of a minimum period of at least one month, and shall continue to be provided until canceled by the Customer, on not less than 5-7 days notice. Unless otherwise specified herein, for the purpose of computing charges in this tariff, a month is considered to have 30 days. All calculations of dates set forth in this tariff shall be based on calendar days, unless otherwise specified herein.

Customers may be required to enter into written Service Orders which shall contain or reference the name of the Customer, a specific description of the service ordered, the rates to be charged, the duration of the services, and the terms and conditions in this tariff.

- 2.1.3.3. At the expiration of the initial term specified in each Service Order, or in any extension thereof, service shall continue on a month to month basis at the then current rates unless terminated by either party upon 5-7 days notice. Any termination shall not relieve Customer of its obligation to pay any charges incurred under the Service Order and this tariff prior to termination. The rights and obligations, which by their nature extend beyond the termination of the term of the Service Order shall survive such termination.
- 2.1.3.4. This tariff shall be interpreted and governed by the laws of the State of Illinois without regard for the State's choice of laws provisions.
- 2.1.3.5. Another telephone company must not interfere with the right of any person or entity to obtain service directly from the Company.
- 2.1.3.6. The Customer has no property right to the telephone number or any other call number designation associated with services furnished by the Company. The Company reserves the right to change such numbers, or the central office designation associated with such numbers, or both, assigned to the Customer, whenever the Company deems it necessary to do so in the conduct of its business.
- 2.1.3.7. The Customer agrees to operate Company-provided equipment in accordance with instructions of the Company or the Company's agent. Failure to do so will void Company liability for interruption of service and may make the Customer responsible for damage to equipment pursuant to section 2.1.3.8 below.
- 2.1.3.8. The Customer agrees to return to the Company all Company-provided equipment delivered to Customer within five (5) days of termination of the service in connection with which the equipment was used. Said equipment shall be in the same condition as when delivered to Customer, normal wear and tear only excepted. Customer shall reimburse the Company, upon demand, for any costs incurred by the Company due to Customer's failure to comply with this provision.

2.2. Establishment of Service

2.2.1.a Installation

RCN shall install basic local exchange service within 3 business days after the line is provisioned by the incumbent carrier whose network or network elements are being utilized to provide basic local exchange service to the customer or by such later date as the customer requests. To the extent a customer is migrating between telecommunications carriers, this requirement shall not apply as long as the customer maintains dial tone.

If RCN fails to install basic local exchange service as required above, RCN shall waive 50% of any installation charges or in the absence of an installation charge or where installation is pursuant to the Link-Up program, RCN shall provide a \$25.00 credit. If RCN fails to install service within 10 business days after the line is provisioned by the incumbent carrier whose network or network elements are being utilized to provide basic local exchange service to the customer or within 5 business days after the customer's requested installation date if such date is more than 5 business days after the date the line is provisioned, RCN shall waive 100% of the installation charge, or in the absence of an installation charge or where installation is provided pursuant to the Link-Up program, RCN shall provide a credit of \$50.00. For each day that the failure to install service continues beyond the initial 10 business days, or beyond 5 business days after the customer's requested installation date if such date was more than 5 business days after the date the line is provisioned RCN shall also provide either alternative telephone service or an additional credit of \$20.00 per day, at the customer's option until service is installed.

2.2.1.b Installation/Repair Appointments

RCN shall keep all repair and installation appointments for basic local exchange service when a customer premises visit requires a customer to be present. RCN will inform the customer when it is necessary for the customer to be present at an installation or repair appointment.

If RCN fails to keep a scheduled repair or installation appointment when a customer premises visit requires a customer to be present, RCN shall credit the customer \$50.00 per missed appointment. A credit shall not apply when RCN provides the customer with 24 hours notice of our inability to keep the appointment. The 24 hour notice period will be deemed to have been met if the customer is notified by 11:59 AM the previous day for a morning (8-12 AM window) appointment, or 4:59 PM the previous day for an afternoon (12-5 window) appointment.

Credits required by Sections 2.2.1.a, 2.2.1.b and 2.6.1 shall not apply if the violation of requirements of those sections:

- a) Occurs as a result of negligent or willful act on part of customer,
- b) Occurs as a result of a malfunction of customer-owned telephone equipment or inside wiring,
- c) Occurs as a result of, or is extended by an emergency situation,
- d) Occurs as a result of RCN's inability to gain access to the premises due to the customer missing an appointment,
- e) Occurs as a result of customer request to change appointment,
- f) Occurs as a result of RCN's right to refuse service to a customer as provided in 83 Ill. Adm. Code 735,
- g) Occurs as a result of a lack of facilities where a customer requests service at a geographically remote location, a customer requests service in geographic area where RCN is not currently offering service, or there are insufficient facilities to meet the customer's request for service as provided for by the incumbent carrier whose network or network elements are being utilized to provide basic local exchange service to the customer.

2.2.2 Minimum Contract Period

- 2.2.2.1. Except as otherwise provided, the minimum contract period is one month for all services furnished. However, if a new residential customer notifies the Company within twenty days after receipt of the first bill that certain services or equipment are not desired, the Company will delete such services or equipment from the customer's account without record keeping or service ordering charge. The customer nonetheless shall be responsible for all monthly usage and installation charges incurred for the use of such service and equipment.
- 2.2.2.2. Except as provided in 2.2.2.1 preceding, the length of minimum contract period for directory listings, and for joint user service where the listing actually appears in the directory, is the directory period. The directory period is from the day on which the directory is first distributed to the customers to the day the succeeding directory is first distributed to customers.
- 2.2.2.3. The Company may require a minimum contract period longer than one month at the same location in connection with special (non-standard) types or arrangements of equipment, or for unusual construction, necessary to meet special demands and involving extra costs.

2.2.3. Cancellation of Application for Service Prior to Establishment of Service

- 2.2.3.1. Where the Applicant cancels an order for service prior to the start of installation or special construction of facilities, no charge applies.
- 2.2.3.2. Where installation of facilities, other than those provided by special construction, has been started prior to the cancellation, the lower of the following charges applies:
- A. The total costs (including overheads) in connection with providing and removing such facilities.
 - B. The monthly charges for the entire initial contract period of the service ordered by the customer as provided in this tariff plus the full amount of any installation and termination charges applicable.
- 2.2.3.3. Where special construction of facilities has been started prior to the cancellation and there is another requirement for the specially constructed facilities, in place, no charge applies.
- 2.2.3.4. Where special construction of facilities has been started prior to the cancellation, and there is no other requirement for the specially constructed facilities, a charge equal to the costs incurred in the special construction (including overheads) applies. Where one or more, but not all, of the services involved in the special construction are canceled, a charge equal to the cost (including overheads) incurred for the discontinued service applies.
- 2.2.3.5. Installation or special construction of facilities for a customer starts when the company incurs any expense in connection therewith which would not otherwise have been incurred and the customer has advised the Company to proceed with the installation or special construction.

2.2.4. Establishing Credit

- 2.2.4.1. The Company, in order to assure the payment of its charges for service, will require applicants and customers to establish and maintain credit.
- 2.2.4.2. The establishment or reestablishment of credit as provided in this Section shall not relieve the applicant or customer from compliance with other provisions of this tariff as to advance payments and the payment of bills, and shall in no way modify the provisions regarding disconnection and termination of service for failure to pay bills due for service furnished.

Applicants for Service

- A. The Company may refuse to furnish service to an applicant that has not established credit or has not paid charges for service of the same classification, previously furnished by the Company at the same or another address, until arrangements suitable to the Company have been made to pay such charges.
- B. The Company may also refuse to furnish service to an applicant that has not paid charges for service of the same classification, previously furnished by any telephone company at the same or another address, until deposit arrangements suitable to the Company are made.

(1) Residence service applicants may establish credit in one of the following ways:

- a. Responding in a manner satisfactory to the Company to a set of standard questions, known as the Credit Evaluation Process (CEP). The applicant may be required to provide proof in support of these responses. The written procedures for the CEP are available for public inspection at the Company's main office at 350 N. Orleans Street, Chicago, IL.
- b. Payment of a cash deposit to the Company in accordance with Section 2.2.5 below.
- c. Providing a sufficient written guarantee of payment for service by a guarantor satisfactory to the Company.
- d. Providing a surety bond, provided that such surety bond has been issued by an insurance company that has received a certificate of authority from the Department of Insurance to do business in Illinois.

(2) Business service applicants may establish credit on one of the following ways:

- a. Responding in a manner satisfactory to the Company to a set of standard questions, known as the Credit Evaluation Process (CEP)

- (3) During the verification of an applicant's credit the Company will permit service to be installed upon the advance payment by the applicant of an amount equal to applicable service charges and initial nonrecurring charges applicable for service installation plus the estimated amount of the applicant's monthly bill for service. Such advance payment will be credited to the applicant's service account but does not relieve the applicant of his responsibility to subsequently establish credit in accordance with (1) or (2) preceding.
- C. If credit is not so established, the Company may disconnect the service not sooner than five days after delivery or eight days after mailing of written notice of intention to disconnect.

When a customer's service has been disconnected in accordance with the above, service will not be reconnected until the customer has established credit.

- (1) A customer may be required to reestablish credit by the payment or increase of a cash deposit in accordance with Section 2.2.5 following when any of the following conditions occur:
- a. During the first twelve months that a customer receives service, the customer pays late four times or has service disconnected by the company for nonpayment two times.
 - b. After the first twelve months that the customer has received service, the customer has had service disconnected twice by the Company within a twelve-month period or the Company provides evidence that the customer used a device or scheme to obtain service without payment.
- (2) Payment by the customer of delinquent bills will not of itself relieve the customer from the obligation of establishing his credit with respect to the account involved or with respect to any other account in connection with the same or any other class of service which the Company may be providing such customer.
- (3) A customer may be required to reestablish credit in accordance with 2.2.4.2 B.(1) b., c., or d. preceding when the amount of service furnished or the basis on which credit was formerly established has significantly changed.
- (4) If a customer fails to reestablish his credit as required by the Company his service may be disconnected not sooner than five days after delivery or eight days after mailing of written notice of intention to disconnect.

2.2.4.3. Special rules for extending credit apply to political campaign service accounts, that is, accounts established by or on behalf of candidates for Federal, State, or Local office.

A. The Company will require an applicant for political campaign service to:

- (1) Make an advance payment in an amount equal to service charges and initial nonrecurring charges applicable for service installation; and
- (2) Provide security in the form of a Cash Deposit, a surety bond or an irrevocable bank letter of credit in an amount equal to the estimated billing for each future two-month period.

In the case of service for less than two months, the Company will require an applicant to make an advance payment in an amount equal to the estimated billing for the entire service period.

2.14. Method for Calculation of Airline Mileage

The airline mileage between two cities can be calculated using the Vertical (V) and Horizontal (H) coordinates of the serving wire centers associated with the Company's POP locations. The method for calculating the airline mileage is obtained by reference to AT&T's Tariff F.C.C. No. 10 according to the following formula:

The square root of:
$$\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}$$

where V1 and H1 correspond to the V & H coordinates of the Customer's SWC and V2 and H2 correspond to the V & H coordinates of the Company's switch.

Example:

	<u>V</u>	<u>H</u>
SWC	5004	1406
EO	5987	3424

The square root of:
$$\frac{(5004 - 5987)^2 + (1406 - 3424)^2}{10}$$

The result is 709.83 miles. Any fractional miles are rounded to the next higher whole number; therefore, the airline mileage for this example is 710 miles.

Three-way Calling – permits adding a third party to an established connection without Company operator assistance

Speed Calling – permits a customer to call other telephone numbers by dialing a code rather than the computer telephone number. The repertory list for such telephone numbers is available in an 8 and 30 number capacity.

Call Return Unlimited – automatically returns the last incoming call whether or not it was answered. To activate Call Return Unlimited, the customer dials a code. The network will then either attempt a callback, or in offices so equipped, the customer will hear an announcement of the telephone number of the last party that called. If the customer wishes to return the call immediately, voice prompts will instruct the customer to dial a certain digit and the call will automatically be returned.

If the number is busy, Call Return Unlimited will continue to redial the number for up to 30 minutes. If the caller uses per call blocking, a called party who activates Call Return Unlimited will not receive the voice back of the calling party's telephone number information but will be able to return the call. Additionally, where mandated, customers who activate call blocking on a per call basis will be able to block the automatic return of calls that originate in prescribed Market Service Areas

Repeat Call Unlimited – The telephone number associated with the last outgoing call placed by the customer (calling party) may be automatically redialed. Activation must occur before another outgoing call is placed by the customer. If the redialed telephone number is busy, the feature will remain active for a 30 minute period and repeatedly check the idle/busy status of the line at intervals determined by the Company. Should the called party's line become idle during this period, the customer will receive a distinctive ring. If the customer answers the ring, completion of the call to the called party will automatically be attempted. The customer need not wait for the completion of the Repeat Dialing process to activate this feature for subsequent outgoing calls. The idle status of the line associated with each activation will be checked.

Call Block – This feature allows customers to designate up to ten from which incoming calls will be automatically completed to a prerecorded announcement circuit which will indicate that calls are not being taken at this time.

Caller ID – This feature provides for the display of the incoming telephone number on a customer provided display device attached to the customer's telephone line or on a telephone or answering machine with a built-in display screen.

Caller ID Deluxe – This feature is only offered to customers subscribing to Caller ID. This feature provides for the display of the listed name associated with the telephone number from which the call is being made. The name is delivered to a customer provided display device.

Call Waiting ID Deluxe – This feature provides customers who subscribe to Caller ID Deluxe and Call Waiting with the ability to see the telephone number and name of a second incoming call. Call Waiting ID Deluxe may require additional customer provided equipment. This service is provided at no additional charge.

Blocking of Calling Number Identification – free per call blocking will be available to all customers who are served by appropriately equipped central offices. Those customers may prevent the delivery of their telephone number and name to the called party through services such as Caller ID, Automatic Callback, or similar Advanced Custom Calling services.

Call Trace – This feature will, upon successful customer activation, automatically trace the telephone number of the line used for the last call received by the customer. The customer must dial a Company-designated code, and activation must occur prior to the time that either another call or the call waiting tone is received by the customer. Within five business days after the successful activation of Caller Originating Trace, the customer must contact the Company to arrange for continued retention of the trace record. The traced record will not be provided to the customer by the Company, but it will be provided to law enforcement officials upon service of proper legal process.

Anonymous Call Rejection (ACR) – a service that enables residential customers the ability to reject calls from parties who have a privacy feature that prevents the delivery of their calling number to the called party when the called party has Caller ID with Name. With ACR the called customer receives no alerting or ringing for a call that is rejected. The call is routed to a denial announcement and subsequently terminated. The calling party hears a denial announcement which indicates the calling party can retry their call after unblocking their number.

Easy Call – This feature provides for the automatic dialing of a dialable telephone number consisting of seven or more digits in the event that the customer's line is taken off-hook and dialing does not commence within a Company determined interval, usually seven seconds.

Distinctive Ringing – a local exchange telecommunications service that enables a customer to have as many as three telephone numbers associated with a single line. Customers subscribing to this service will be able to receive calls dialed to two or three separate telephone numbers without having a second or third access line. Distinctive ringing will be provided for each of the additional telephone numbers to facilitate identification of incoming calls. A distinctive Call Waiting tone for each additional telephone number will be provided, where facilities permit, to customers subscribing to the Call Waiting feature of Custom Calling Service.

Basic Voice Mail – provides the ability for incoming customer calls to be answered and a message recorded. Voice mail allows calls to be answered when no answer is received after a certain number of rings or while the customer line is in use.

Value Voice Mail – provides all of the features of normal voice mail plus extra recording time – allows for 60 messages.

Family Voice Mail – provides all of the features of normal voice mail and allows up to 3 members to receive separate and private messages.

The following features are included in the voice mail package, but can be ordered individually should the customer choose to do so:

Call Forward Busy Line – In the event that the called telephone number is busy, this feature automatically forwards incoming calls to a predetermined, dialable telephone number served by the same central office switch, or provides intraswitch forwarding to a predetermined, dialable telephone number where technically available. If incoming calls are transferred to a number served by the same or different central office switch, multiple calls will be transferred simultaneously provided that there are sufficient facilities to accept the calls.

This feature is not compatible with Call Waiting or Direct Inward Dialing Service.

Where a charge (local or long distance) is applicable for a call between the customer's telephone and the telephone to which calls are forwarded, such charge (dial station-to-station rate) is billed to the customer on every call forwarded to and answered at that telephone.

Call Forward Don't Answer – In the event that the called telephone number is not answered within Company designated parameters (normally three to four rings), this feature automatically forwards incoming calls to a predetermined, dialable telephone number served by the same central office switch, or provides intraswitch forwarding to a predetermined, dialable telephone number, where technically available. If incoming calls are transferred to a number served by the same or different central office switch, multiple calls will be transferred simultaneously provided that there are sufficient facilities to accept the calls.

Where a charge (local or long distance) is applicable for a call between the customer's telephone and the telephone to which calls are forwarded, such charge (dial station-to-station rate) is billed to the customer on every call forwarded to and answered at that telephone.

Hunting – Routes a call to an idle station line in a prearranged group when the called station line is busy.

Priority Call - Priority Call is an arrangement which provides for one distinctive audible signal to the customer when a call is received from one of up to ten prespecified telephone numbers. If the customer also subscribes to Call Waiting, and the call waiting tone is altered with a distinctive pattern.

Ultra Call Forward – Provides the ability to activate/deactivate their Call Forward Variable feature from any touch-tone or touch-tone signaling telephone. The customer will dial a Remote Access Directory Number and then be guided by voice prompts to enter required information, including a Personal Identification Number. Calls forwarded by this feature may be subject to local or toll charges as appropriate.

Remote Call Forward – This feature automatically forwards all incoming calls dialed to that Remote Call Forwarding telephone number to the connecting number. The subscriber of Remote Call Forward is responsible for usage charges from the call forward number to the terminating number. The caller is responsible for usage charges from where the call is being originated.

Select Forward – This feature permits a customer to prespecify up to a maximum of ten (10) telephone numbers from which calls are to be forwarded. The end user activates this feature by dialing a code to create a screening list of the six telephone numbers to be forwarded.

Basic Business Voicemail – provides small business customers with 1 – 10 mailboxes. Greetings may be up to 2 minutes in length per mailbox. Messages may be up to 5 minutes in length per mailbox. Mailbox users may save up to 30 messages. The maximum number of days unplayed messages can be stored is 20 days. The maximum number of days played messages can be stored is 20 days.

5. Optional Offerings

5.1. Directory Assistance

Customers and users of the Company's calling services (excluding 800/888 services) may obtain directory assistance in determining telephone numbers by calling the Directory Assistance operator. For all other directory assistance calls customers would dial 555-1212 or NPA-555-1212.

Requests for information other than telephone numbers will be charged at the same rate as shown for the applicable request for telephone numbers.
